PROJECTS

Discussion Forum for CS Department

This web app is hosted on https://407ccd0a5e.pythonanywhere.com/discussion_forum

- ◆ Fully functional discussion forum that allows user (registration and login required) to ask questions, answer questions, and vote for the question they like.
- ◆ Python is used for back end development; AJAX is used for asynchronous call in the voting function; Database abstraction layer (DAL) is used for SQL injection prevention.

Online shopping bookstore app

- ◆ A fully functional full stack online store. Implemented user registration, login, shopping cart, and payment method. Bootstrap and standard CSS were used for front-end design; C# with .NET framework were used for server side programming.

Smartphone-Based Recognition of human activities and postural transitions

- ◆ Designed machine learning algorithm to analyze human activity signal recorded via smartphone.
- ◆ Successfully classified 6 standard movements and 6 transition movements with error rate less than 10 %.
